ADDRESS

TO THE MEMBERS OF THE

American Antiquarian Society.

THE having been a large accession of Members of the AMERICAN ANTIQUARIAN SOCIETY, since its objects were communicated, the Government of this National Institution, residing in Massachusetts, have judged it to be their duty to address a summary account of its principles and progress to all who have been elected. This measure is adopted with a confidence, that those Members, if any, who may have become languid, will be reanimated in its service—and that those who are unapprized of its views and concerns, will discharge their duty with cheerful ardour, when they know what service they can perform.

Our Institution, in all its objects and concerns, is intended and considered as *National*, although it derives its charter and its national appellation from the Legislature of Massachusetts, by an act passed October 12, 1812. This local authority was resorted to from doubts having been expressed,

whether Congress had the power to grant a charter without the District of Columbia. Its Members are selected from all parts of the Union. Its respectability is inferred from its numbers, and from its comprising men of the first standing and intelligence in the nation, and some of the first distinction in other countries. Most other societies, although of a benevolent and useful character, are necessarily limited in their views and duration. The objects of this Institution are commensurate with the lapse of time, and its benefits will be more and more accumulating in the progression of ages. As the antiquities of our country, by various means, are rapidly decreasing, an Institution whose business will be to collect and **PRESERVE** such as remain, and can be obtained, must be viewed as highly important.

The chief objects of the inquiries and researches of this Society, which cannot too soon arrest its attention, will be American Antiquities, natural, artificial, and literary. As all things which in their nature are durable, if preserved from casualty and the ravages of time, in a course of years will be *antique*, it will also be an object of this Society to deposit, from time to time, such modern productions, as will, with accuracy, denote to those who succeed us, the progress of literature, the arts, manners, customs, and discoveries of the present age.

Thus, by an attention to these objects, which the Society hope to promote by the exertion of its Members residing in various sections of this vast continent, the utility of the Institution will speedily be realized, and may in time vie with similar insti-

tutions in Europe, which are now so justly celebrated.

Each individual of the Society, we persuade ourselves, will imbibe a belief, that much of its reputation and usefulness depends on his individual efforts. Members in our own country, particularly, are not considered as *honourary*, so far as to exempt them from *acting* in the promotion of the honour and prosperity of the Institution. All, we trust, will feel an interest in collecting and forwarding to the President, Vicepresidents, Counsellors, Secretaries, Librarian, or other Receiving Officers of the Institution, such antiquities of our country, whether of nature or of art, as may be portable, and which he can obtain ; and authentick accounts of such as cannot be transported ; with such articles of modern date as are curious and interesting, and will tend to aid the establishment.

It is requested that articles of Indian fabrication may be accompanied with some account of the place of its deposit, probable age, supposed use, and any other matter which may elucidate its history. Authentick accounts of Indian mounds, fortifications, and other monuments and remains, communicated by mail, or through the Receiving Officers, to either of the Secretaries, are particularly desirable. Information of this kind, published under the sanction of the Society, will prevent much publick imposition, and seems appropriate to the Institution. This request is particularly addressed to Members residing in the Western States, where, it is supposed, such remains are the most numerous and perfect. A Committee for publication are now

preparing, and will commit a volume to the press, as soon as they can be furnished with sufficient original materials for the purpose.

Although the Society is in its infancy, we are happy to announce, that it is expanding into manly growth, and, with due patronage and exertion, will become pre-eminently useful. The Cabinet is not yet extensive; but the Members, we trust, will soon make it highly respectable and useful, by their occasional contributions. Funds are about to be procured, from the interest of which a Librarian and Cabinet Keeper may be supported, whose business shall be to attend to the property of the Society, and to keep it in a state of Preservation.

The catalogue of our Books is already respectable. Our Library, of about 5,000 volumes, consists principally of books printed in the three last and present centuries. Some are of the fifteenth century. Many of these are peculiarly valuable, particularly American authors; as by them we learn the state of religion and literature at the period of their date. We have also files of the first Newspapers published in British North America, which, probably, are the earliest printed in this Western world. Also, some of the first periodical works which appeared in Europe. Congress, and a number of the State Legislatures, have passed acts and resolves for furnishing the Society with a copy of all their printed statutes, and such as hereafter shall be printed, together with their other printed documents. These, so far as they have been printed, have been deposited in the Library,

This liberality, it may be presumed, will become general.

Among the articles for this deposit, books of every description, including pamphlets and magazines, especially those that were early printed, either in South or North America; files of newspapers of former times, or of the present day, are particularly desirable; as are specimens, with written accounts respecting them, of fossils, handicrafts of the Aborigines, &c. manuscripts, ancient and modern, on interesting subjects, particularly those which give accounts of remarkable events, discoveries, or description of any part of the continent or islands in the American seas, maps, charts, &c.*

With a view to the safety of the Library and Cabinet, an inland situation has been preferred. By the liberality of the President, a suitable building will speedily be erected in Worcester. A site sufficiently spacious and commodious has been obtained, and the materials for building are nearly prepared.

*There are but few who do not wish their labours to be preserved. Every author, every printer or publisher of a book, or publick journal, (a) by sending a copy of each of the works they write, print or publish, to the Library of this Society, will have them recorded, and deposited in the best place possible for security and PRESERVATION; and, this not being a circulating library, they will remain for centuries subject to the inspection of historians and scientifick men, and be a source of high gratification to Antiquaries of succeeding ages.

(a) Files of Newspapers, Magazines, or other periodical works, can be sent *annually* to Receiving Officers in the State where they are published, who will forward them to the place of deposit.

It may be thought superfluous to observe, that a Society of this kind cannot be supported without some permanent funds. The munificence of the Founders has given a name and standing to our Institution ; but further agency is necessary for its future nourishment and support. Bodies of this cast, however well formed and fashioned their structure, require some *inherent stamina*, or *self-renovating power*, as the *spring* of perpetual life and action. Donations, legacies, contributions, and royal patronage, are the support of those in Europe, and have raised them to a state of eminence. And it is not doubted that there are persons in this country, by whose aid the AMERICAN ANTIQUARIAN SOCIETY will be enabled to pursue those researches, so desirable, into the antiquities of this New World, and to rescue them from the ravages of time, for the use and improvement of the Historian, the Philosopher, and all scientifick men of our country, of the present age, and of posterity.

OLIVER FISKE, *per order.*
